Document Identifier: **PMC8920229**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Written informed consent was obtained from all participants before commencing the study, and the written consent from parents was obligatory together with own consent in case of girls under 16 years.
IRB: The study was approved by the Ethics Committees of the Osaka University Hospital (Osaka, Japan) and other individual institutions.
Inclusion and Exclusion Criteria
The inclusion criteria were as follows: (1) healthy women aged 12-18 years who attended for HPV vaccine either bivalent (Cervarix, GlaxoSmithKline Biologicals, London, UK) or quadrivalent (Gardasil, Merck, Darmstadt, Germany) vaccine at public expense, (2) women aged 20-21 who already had HPV vaccination and visited clinichospitals for routine cancer screening, (3) unvaccinated women aged 20-21 who attended for cancer screening.
Attrition
not detected.
Sex as a biological variable
The inclusion criteria were as follows: (1) healthy women aged 12-18 years who attended for HPV vaccine either bivalent (Cervarix, GlaxoSmithKline Biologicals, London, UK) or quadrivalent (Gardasil, Merck, Darmstadt, Germany) vaccine at public expense, (2) women aged 20-21 who already had HPV vaccination and visited clinichospitals for routine cancer screening, (3) unvaccinated women aged 20-21 who attended for cancer screening.
Subject Demographics
Age: The inclusion criteria were as follows: (1) healthy women aged 12-18 years who attended for HPV vaccine either bivalent (Cervarix, GlaxoSmithKline Biologicals, London, UK) or quadrivalent (Gardasil, Merck, Darmstadt, Germany) vaccine at public expense, (2) women aged 20-21 who already had HPV vaccination and visited clinichospitals for routine cancer screening, (3) unvaccinated women aged 20-21 who attended for cancer screening.
Randomization
not detected.
Blinding

not detected.
Power Analysis
not detected.
Replication
not required.

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis The statistical analysis was performed using Fishers exact test.	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
