SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Materials and Methods Study population This study was approved by the Ethics Committee at the participating university hospital (No. 20170024).
Consent: All subjects provided informed consent to participate.
Inclusion and Exclusion Criteria
Volunteers with a previous history of trauma to the lower leg were excluded.
Attrition
not detected.
Sex as a biological variable
Seven Japanese healthy volunteers (three males and four females) with a mean age (standard deviation: SD) of 27.1 2.1 years were recruited.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
In order to examine the interobserver reliability, we performed a blinded analysis so that the two observers did not see each others ROIs.
Power Analysis
not detected.
Replication

Statistical analysis The analyses involving independent triplicate analyses on different days were performed to assess the reliability of the calculations.
Number: Statistical analysis The analyses involving independent triplicate analyses on different days were performed to assess the reliability of the calculations.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The imaging values were measured using ImageJ 1.51k (available at http:rsbweb.nih.govij National Institutes of Health, Bethesda, MD, USA).	ImageJ		Suggestion: ImageJ, RRID:SCR_003070(link)
All statistical analyzes were performed using SPSS statistics software, version 24 (IBM, Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Wilcoxon signed-rank test was used to examine the differences between the control and stress groups in each sequence on the TA, SOL, and GM.	Wilcoxon signed-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
