SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the Bioethical Review Board of Poznan University of Medical Sciences.
Inclusion and Exclusion Criteria
not detected.
Attrition
The group of patients who required treatment was further divided into the subgroups of patients who after initial treatment recovered from ROP (n = 52), and the group of patients with an aggressive form of the disease who required re-treatment (n = 24).
Sex as a biological variable
not detected.
Subject Demographics
Age: The study compared 76 patients who developed ROP requiring treatment (case group: mean gestational age: 25 +-1.72 weeks mean weight: 830 +-206 g) with 87 patients with ROP that resolved spontaneously (control group: mean gestational age: 28 +-2.07 weeks mean weight: 1125 +-352 g).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Mann-Whitney test, kh2 test and Students t-test were used to investigate the relationships between variables.	Mann-Whitney test
	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
