SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
This procedure was performed in triplicates.
Number: This procedure was performed in triplicates.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Tetracycline hydrochloride effectiveness test: Kelsey-Maurer test In sterile test tubes, 4.5 ml of each vehicle - distilled water, 0.9 saline solution or 2 lidocaine anesthetic with epinephrine 1:80,000 - was added to TTC-HCL (125, 250, and 500 mg) at pH 1.9 and pH 7.0 500 ml of the bacterial suspension was added, homogenized in a vortex for 10 s, and allowed to act as a disinfectant at clinically viable times for 30, 60, and 120 s.	Kelsey-Maurer test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
