SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: MATERIALS and METHODS The study was approved by the Clinical Research Ethics Committee of the Haydarpasa Numune Training and Research Hospital (decision no: KAEK 2021265, date: 04.10.2021).
Consent: Signed informed consent forms were waived due to the retrospective cross-sectional design of the study.
Inclusion and Exclusion Criteria
Patients with concomitant illness (malignancy, hepatic, psychiatric, endocrine, or other major systemic diseases), children, drug users, and smokers were excluded from the study.
Attrition
not detected.
Sex as a biological variable
Patients This study included 39 patients (25 males and 14 females) who could have both CT and non-EPI DWI MRI in the last 4 weeks of the preoperative period among those operated for suspected cholesteatoma between April 1, 2014-2020.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
Imaging Evaluation Images were examined by the same radiologist who was blinded to the postoperative information of patients and had 17 years of experience in head and neck imaging to ensure the objectivity of evaluation.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis International Business Machines Corporation Statistical Package for the Social Sciences version 22 (IBM Corp.	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)
IBM SPSS Statistics for Windows, Version 22.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The agreement of the presence of a lesion and lesion localization on radiology according to surgical reports were evaluated with McNemars test, Cohens Kappa coefficient test.	McNemars test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
