Document Identifier: **PMC8939918**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the ethics committees at Showa University (number: 2125) and The University of Texas MD Anderson Cancer Center (number: PA14-0544).
Consent: A waiver of informed consent was granted on the basis of the studys
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Cell Line Authentication

not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Cell Lines			
We used the previously described EMT scoring metric developed by George et al. 9 This metric quantifies the EMT spectrum it was developed via an iterative method that ranks candidate gene products on the basis of their ability to resolve NCI-60 cell line samples with regard to their respective EMT status.	NCI-60		
Software and Algorithms			
Transcripts were aligned to the human reference assembly GRCh37 (Ensembl) using the STAR application (v. 020201).	Ensembl		
	STAR		
Assembly and expression quantification were performed using Cufflinks tools (v. 2.2.1).	Cufflinks		Suggestion: Cufflinks (RRID:SCR_014597)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The associations between features were analyzed using the Fishers exact test.	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
