SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed consent was obtained on the first page by informing healthcare professionals about the purpose of the research and ethical issues.
IRB: The data were collected in June 2019 and the ethics committee of a Istinye University was approached for approval to conduct a retrospective review in April 2020 (Decision No:2020/03-03; Date: 17 March 2020).
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
Healthcare professionals in the 19–62 age group (M = 26.7; SD = 7.6) were mostly female (82.7%), single (68.9%), and graduates of a medical vocational high school (58.9%).
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis The data of the study were analyzed by the IBM SPSS Statistics 20 (IBM SPSS Corp . , Armonk , NY , USA) program (licensed by #stanbul University-Cerrahpa#a) .	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Finally, parametric comparative analyses (independent samples t-test, one-way ANOVA, and post hoc Tukey HSD) were used to compare measurements by demographic characteristics.	t-test
	ANOVA
	Tukey HSD

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
