Document Identifier: **PMC8941534**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The present study was approved (approval no. 1715) by the Research Ethics Committee of Wakayama Medical University and histological specimens were retrieved from Wakayama Medical University hospital archives.
Consent: Oral informed consents were provided by all patients for the use of their tissues.
Inclusion and Exclusion Criteria
not detected.
Attrition
A total of 20 cases of ASE and 12 cases of CIS were selected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Three independent biological replicates were performed.

Type: Three independent biological replicates were performed.
Number: Three independent biological replicates were performed.
Cell Line Authentication
not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Antibodies The following commercial antibodies were used: CK-1e (1:200, mouse monoclonal cat. no. sc-373912 Santa Cruz Biotechnology, Inc.), DEC1 (1:400 rabbit polyclonal cat. no. NB100-1800 Novus Biologicals, LLC), PCNA (1:1,000 mouse monoclonal cat. no. sc-56), HCAM (CD44 1:200 mouse monoclonal sc-7297 both from Santa Cruz Biotechnology, Inc.), FLAG (1:1,000 mouse monoclonal cat. no. F3165) and actin (1:10,000 mouse monoclonal, A5441 both from Sigma-Aldrich Merck KGaA).	DEC1		Suggestion: (Santa Cruz Biotechnology Cat# sc-101023, RRID:AB_2065356)(link)
	PCNA		
	CD44		
	FLAG		
	actin		
Anti-rabbit and mouse HRP IgG secondary antibodies (1:5,000 cat. nos. 17502 and 17601, respectively) were purchased from Immuno-Biological Laboratories, Co., Ltd.	Anti-rabbit		
Experimental Models: Cell Lines			
CA9-22 cells stably overexpressing DEC1 (CA9-22DEC1) and control empty vector-transfected cells (CA9-22vector) were evaluated for stable cells as previously described (21).	CA9-22		
Software and Algorithms			
The percentage of intensity score was calculated using Microsoft excel.	Microsoft excel		Suggestion: Microsoft Excel (RRID:SCR_016137)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
