SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Each participant signed a self-written consent to take part in the study.
Inclusion and Exclusion Criteria
There were originally 350 men smokers over the age of 20 who had visited AL Zahra hospital, however, 129 participants were removed according to the exclusion criteria of this study.
Attrition
There were originally 350 men smokers over the age of 20 who had visited AL Zahra hospital, however, 129 participants were removed according to the exclusion criteria of this study.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was conducted using the SPSS software version 16 (SPSS Inc., Chicago, Illinois, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For comparing the mean of pulmonary functions in categories of variables, independent t-test is used.	t-test
Spearman correlation analysis was performed to get the association between the severity of long loss and study variables.	Spearman correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
