SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The retrospective study was approved by The Ethics Committee of Shanghai Pulmonary Hospital (approval number k17-138).
Inclusion and Exclusion Criteria
Inclusion criteria: 1) MTB culture was positive, and MTB cultural-based DST indicated at least rifampicin resistance on extrapulmonary specimens.
Attrition
After excluding 43 patients with incomplete clinical data, 1510 patients were included in the final statistics (Figure 1).
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using Stata 14 software (StataCorp, Texas, United States (US).	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Thus, In the present study, a second Xpert test was performed on newly diagnosed patients.	Xpert test
Statistical Analysis Intergroup differences (PTB and EPTB Different anatomical site of EPTB) were determined by the chi-square test or Fishers exact test to obtain significant factors.	chi-square test
	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
