SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the Institutional Review Board and ethics committee.
Inclusion and Exclusion Criteria
Exclusion criteria included (a) nonavailability of neuro-imaging and (b) poor image resolution because of which lesion boundaries could not be delineated.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
7 All the lesions were flipped onto the left side to increase the statistical power and to create an overlay map.
Replication
not required.
Data Information

Availability: The location of these voxels was further categorized into anatomical sites such as the rostral, middle, and caudal parts of the medulla, as described by Kim et al. 9 Data Availability Data can be made available on request.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The individual lesions were mapped onto the Montreal Neurological Institute (MNI) space manually using MRIcron (https://www.nitrc.org/projects/mricron).	MRIcron		Suggestion: MRIcron (RRID:SCR_002403)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
