Document Identifier: **PMC8953387**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: 1 In brief, recruitment of study subjects, informed consent, assent, Health Insurance Portability and Accountability Act authorization, and data collection are all enabled by the registry website.
IRB: Emory Universitys Institutional Review Board (Emory University) approved this study.
Inclusion and Exclusion Criteria
For the current study, the inclusion criteria were as follows: clinical documentation or parent report of 3q29Del and a completed medical history and feeding questionnaire.
Attrition
not detected.
Sex as a biological variable
Analysis We coded variables from the medical questionnaire (age at completion, sex, and autism diagnosis) as follows: age at completion, numerical value in years sex, male yesno and autism diagnosis, yesno.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Data Information
Availability: Documents can be uploaded to the registry website, and it is requested but not required that participants upload their clinical genetics report indicating a diagnosis of 3q29Del.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
We first summarized continuous and discrete variables in a univariate fashion, comparing cases with controls using t tests for continuous data and kh2 or Fishers exact test for discreet data.	t tests
	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
