SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: A written informed consent was obtained each patient.
IRB: The study protocol was approved by the Institutional Review Board of each study center.
Inclusion and Exclusion Criteria
not detected.
Attrition
The researchers who participated in this study developed a questionnaire, and it was verified that the meaning of each question was communicated well to four (n=2 RA and n=2 AS) patients.
Sex as a biological variable
A total of 307 patients (162 males, 145 females median age: 48 years range, 18 to 81 years) receiving bDMARD for more than six months were included.
Subject Demographics
Age: A total of 307 patients (162 males, 145 females median age: 48 years range, 18 to 81 years) receiving bDMARD for more than six months were included.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using the MedCalc version 18.6 software (MedCalc Software Bvba, Ostend, Belgium).	MedCalc		Suggestion: MedCalc (RRID:SCR_015044)(link)
The graphs were visualized using the GraphPad Prism for Windows version 7.00 (GraphPad Software Inc., CA, USA).	GraphPad Prism		Suggestion: GraphPad Prism (RRID:SCR_002798)(link)
	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
