SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The survey protocols and all materials , including the survey questionnaire , received ethical approval from the Office of Research Ethics , University of Waterloo , Canada (ORE 41512) and the Institutional Review Board of Korea Health Promotion Institute (120160811107AN01-2004-HR-042-02)
Consent: All participants provided consent to participate.
Inclusion and Exclusion Criteria
The response rate was defined as the number of eligible respondents who completed the survey divided by the estimated number of eligible respondents that were selectedcontacted the American Association for Public Opinion Research (AAPOR)
Attrition
Two measures were used: 1) SecperQ, defined as the total time taken to complete the survey divided by the number of questions answered by the respondent, and 2) RDK, defined as the number of questions answered with either Refused or Dont know responses divided by the number of questions answered by the respondent.
Sex as a biological variable
not detected.
Subject Demographics
Age: Sample size The survey was administered as an online web survey to 4794 adults aged >=19 years (4234 tobacco andor nicotine users and 560 non-users) .
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
