SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: After providing informed consent, a total of 336 postpartum mothers completed the survey questionnaire, either by self-administration or a verbal interview conducted by a trained midwife in one of the participating clinics.
Field Sample Permit: This study was approved by the Mahidol University Social Sciences Institutional Research Board (MUSSIRB), certificate approval number 2019211.1510.
IRB: This study was approved by the Mahidol University Social Sciences Institutional Research Board (MUSSIRB), certificate approval number 2019211.1510.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
Measures Husband involvement Based on the theory of social support, the measurement of husband involvement was developed to indicate pregnant womens desires and needs.
Subject Demographics
Age: All mothers approached in this study were at least 18 years old, living with a spouse, and had visited an independent midwifery clinic for postpartum care from November 2019 to January 2020.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.
Cell Line Authentication
Authentication: Each domain was validated and only the items with acceptable factor loadings were retained.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The thresholds for acceptable goodness of fit included a comparative fit index (CFI) > 0.95, root mean square error of approximation (RMSEA) < 0.08, and standardized root mean square residual (SRMR) < 0.08. 40,41 In this study, all statistical analyses were performed using Predictive Statistics Software (PASW Statistics 18.0 SPSS Inc., Chicago, IL).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
