Document Identifier: **PMC8967225**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
Randomized network variants Using mass-balanced randomization (39), we create 58 random network variants for which we determine concordance modules.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Code Information
Availability: The implementation of this approach is available at https:github.comankuekenconcordant_complexes.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The resulting P values are corrected for multiple hypotheses testing using the Benjamini-Hochberg procedure.	Benjamini-Hochberg
We test for differences in the number of concordance modules, the size of the largest concordance module, the mean concordance module size, the mean effective metabolite degree, the maximum effective metabolite degree, and the reducibility index using z scores, assuming that the null distributions over the ensemble of randomized metabolic networks are normal.	We test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
