Document Identifier: **PMC8976936**

# SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

**Table 1: Rigor Adherence Table**

| |
|---|
| Ethics |
| IRB: This study followed the Declaration of Helsinki and guidelines for experimental investigation in human subjects laid down by the Institutional Review Board of Seoul St. |
| Consent: Written informed consent was obtained from consecutive patients who met the eligibility criteria. |
| Inclusion and Exclusion Criteria |
| Patients with IOP of more than 21 mm Hg, or family history of glaucoma were excluded. |
| Attrition |
| not detected. |
| Sex as a biological variable |
| not detected. |
| Subject Demographics |
| Age: not detected. |
| Weight: not detected. |
| Randomization |
| Interobserver difference in measuring MvD angle was calculated as the intraclass correlation coefficients (ICCs) and their confidence intervals (CIs) in 30 randomly selected images. |
| Blinding |
| Two independent observers (H.Y.P and S.A.K.) blinded to the clinical data identified MvD. |
| Power Analysis |
| not detected. |
| Replication |
| not required. |

**Table 2: Key Resources Table**

| Your Sentences | REAGENT or RESOURCE | SOURCE | IDENTIFIER |
|---|---|---|---|
| Software and Algorithms | | | |
| The circumferential extent of MvD was measured using ImageJ software (http:rsb.info.nih.govijindex.html). | ImageJ | | Suggestion: ImageJ, RRID:SCR_003070( link) |
| All statistical analyses were performed using SPSS Statistics software (ver. 16.0 IBM Corp., | SPSS | | Suggestion: SPSS, RRID:SCR_002865( link) |

**Other Entities Detected**

| Your Sentences | Recognized Entity |
|---|---|
| Statistical Tests | |
| Data Analysis Students t-test and the kh2 test were used to compare continuous and categorical variables, respectively. | t-test |

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
