Document Identifier: **PMC8977545**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.
Cell Line Authentication
not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
They were reacted with normal goat serum for 1 h at room temperature to block non-specific binding and incubated with anti- parvalbumin polyclonal antibody (1:100, Thermo Fisher Scientific) for overnight at 4degC.	anti-		
Cells were washed with PBS and incubated with fluorescein isothiocyanate (FITC)-conjugated anti-rabbit secondary antibody for 2 h at room temperature.	anti-rabbit		
Experimental Models: Cell Lines			
HT22 cells were seeded at 5 x 103 cellswell density in 96-well culture plate and incubated for 24 h .	HT22		Suggestion: RRID:CVCL_0321(link)
Software and Algorithms			
The intensity of band was statically analyzed by Image J software.	Image J		Suggestion: ImageJ, RRID:SCR_003070(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Results of each groups were compared by two-way analysis of variance (ANOVA) followed by post-hoc Scheffes test and the effect of quercetin by dose-dependent manner were compared by two-way ANOVA followed by Dunnetts multiple comparison. $p < 0.05$ was considered to be statistically significant.	analysis of variance
	ANOVA
	Scheffes test
	Dunnetts multiple comparison

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
