SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
Items with more than 75 % of the votes remained in the model and others were excluded.
Attrition
not required.
Sex as a biological variable
Gender Female 12 11 Male 23 21 Education Subspecialty and medical fellowship 10 9 Medical specialty 13 11 PhD 3 3 Residency 6 6 Master 's degree 3 3 Occupation Physician (including all medical categories and residencies) 24 22 Member of the hospital management team 4 4 Nurse 4 3 Academics with outstanding work in the areas of study 3 3 Work experience Below 10 years 18 17
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The literature required at this step was prepared by the narrative review approach, using the following words and phrases in search engines Google Scholar	Google Scholar		Suggestion: Google Scholar (RRID:SCR_008878)(link)
, PubMed , Science Direct , EMBASE , and Web of Science databases , Assessment , Teaching hospital , Medical education , and medical resident .	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
	EMBASE		Suggestion: EMBASE (RRID:SCR_001650)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
