SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
In all experiments, ThT fluorescence measurement was done in triplicate and the mean of the three measurements was determined.
Number: In all experiments, ThT fluorescence measurement was done in triplicate and the mean of the three measurements was determined.

Cell Line Authentication
not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Cell Lines			
In vitro cell viability assay Human neuroblastoma SH-SY5Y cells, were cultured in DMEM-F12 medium as reported previously.	SH-SY5Y		Suggestion: RRID:CVCL_0019(link)
Software and Algorithms			
(4,5-dimethyl tiazol-2-yl)-2,5 diphenyl tetrazolium bromide (MTT) , and dialysis tube were purchased from Sigma (St . Louis , MO ,	Sigma		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The significant differences between the means of the treated and untreated groups were calculated by unpaired Students t-test and p-values less than 0.01 were considered significant.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
