SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: 2 Methods 2.1 Study design and patients After approval by the ethics committee of Kobe City Medical Center General Hospital
Inclusion and Exclusion Criteria
Of the 67 patients identified , 9 were excluded because they lacked information on their height (8 patients) or the date of injury (1 patient) .
Attrition
As a result , 10 and 24 patients were classified as non-displaced FFP type I (Ia: 10) and type II (IIa: 2 IIb: 5 IIc: 17) , respectively .
Sex as a biological variable
Fig . 1 From epidemiologic studies , the majority of patients with FFP were females 19 .
Subject Demographics
Age: By careful evaluation of injury mechanism and radiological data , FFP patients who were >= 65 years of age were identified from the electronic medical records between October 2011 and October 2019 .
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
CT image analysis was performed using SYNAPSE VINCENT software version 5.0 (Fujifilm , Tokyo , Japan)	SYNAPSE VINCENT		
Statistical analyses were conducted in SPSS for Windows , Version 25 (	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
2.3 Statistical analysis After Shapiro-Wilk test of normality , data were compared between the 2 groups by t test and Mann-Whitney U test for parametric and nonparametric tests , respectively .	Shapiro-Wilk test
	t test
	Mann-Whitney U test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
