Document Identifier: **PMC8987553**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed consent was obtained from all individual participants included in the study.
IRB: This study was approved by the Institutional Review Board (IRB) of Keio University School of Medicine (IRB No. 20110142).
Inclusion and Exclusion Criteria
not detected.
Attrition
Finally, 21 patients were enrolled in the study.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
IBM SPSS Statistics ver. 24.0 (IBM Co., Armonk, NY, USA) was used for all statistical analyses.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
A comparison of each independent variable between the 2 groups was performed using the Mann-Whitney U-test for the MIB-1 index and an independent t-test for other continuous variables.	Mann-Whitney U-test
	t-test
A chi-square test was used to analyze discrete variables.	chi-square test
A p-value for comparison of regrowth-free probability between patients with surgical margins at zone 3 and those with surgical margins at 1 or 2 was determined by Log-rank test.	Log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
