SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not detected.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
2.4 Animals Male Wistar rats (159.41 ± 11.59 g , n = 18) were supplied by the Ceará State University Animal Center .
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Chemical analyses were performed in triplicate.
Number: Chemical analyses were performed in triplicate.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Organisms/Strains			
2.4 Animals Male Wistar rats (159.41 ± 11.59 g , n = 18) were supplied by the Ceará State University Animal Center .	Wistar		Suggestion: RRID:RGD_13508588(link)
Software and Algorithms			
2.8 Statistical analysis The results were expressed as mean ± standard error of the mean (SEM) and analyzed using Prism version 9.3.1 for Windows (GraphPad Software, CA, USA).	Prism		Suggestion: Meta-Prism (RRID:SCR_021836)(link)
	GraphPad		Suggestion: GraphPad Prism, RRID:SCR_002798(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
One-way ANOVA followed by Tukey's test and student's t-test were used to assess whether the mean values of the groups were significant; a p value of < 0.05 was considered significant.	ANOVA
	Tukey's test
	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
