SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics	
not required.	
Inclusion and Exclusion Criteria	
not required.	
Attrition	
not required.	
Sex as a biological variable	
not required.	
Subject Demographics	
Age: not required.	
Weight: not required.	
Randomization	
not required.	
Blinding	
not required.	
Power Analysis	
not required.	
Replication	
not required.	
Data Information	
Identifiers: In the context of the PoC approach, the negatively and positively charged points were utilized with a value of +-0.50 au to mimic	16,33,79,80

the roles of Lewis bases and acids, 16,33,79,80 respectively.	

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
