SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Patients were asked to participate after the physicians decision for treatment with DMF was made then, their written informed consent was obtained before patients entered the study.
IRB: The study received approval from the ethics committee of the Hamburg Medical Association and was reported to the responsible federal authority, German National Association of Statutory Health Insurance Physicians, Central Federal Association of Health Insurance Funds, and Association of Private Health Insurance e.V.
Inclusion and Exclusion Criteria
not detected.
Attrition
After 52 weeks, data from 257 patients were available for our interim analyses.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data were analyzed with Statistical Analysis System version 9.4, considering a statistical significance (p) of 0.05 for all statistic tests performed.	Statistical Analysis System		Suggestion: Statistical Analysis System (RRID:SCR_008567)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
A Wilcoxon signed-rank test was used for analyzing the change in BSA, absolute PASI, and PASI reduction from baseline to week 52.	Wilcoxon signed-rank test
Psoriasis severity at week 52 versus baseline PASI < 3 and PASI < 5, scalp-PGA 01 (clearalmost clear), nail-PGA 01, PP-PGA 01, itch NRS < 3 (mild or no pruritus) was analyzed using the McNemars test.	McNemars test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
